Standard and Pro v4.1 : Standard: 25750257 Pro: 18523780 Automate v4.1b 180 records Category:Databases Category:Software defect management Category:Open-source software for WindowsThe invention relates to a toilet having a tank and a water supply arrangement for supplying water via an outlet pipe for a flushing operation, having a flush line attached to the outlet pipe and having at least one flush valve which is arranged in the flushing line in a flow-off direction and into which a flushing liquid is introduced via an inlet line. A toilet which is described in U.S. Pat. No. 5,053,757 has a tank in which a water level can be adjusted and which is arranged in a wall which can be closed by a cover which is attached to a supporting frame. A water supply arrangement for supplying water via a flush line is arranged in the wall and is connected to the outlet pipe arranged in the cover. The flushing line branches off the outlet pipe into a first section and a second section, with a flush valve which is arranged in the flushing line. A shut-off valve is situated between the sections. A first shut-off valve, which is arranged in the inlet line, a second shut-off valve and a third shut-off valve are also situated between the two sections. A toilet having the generic features is known from the DE 39 41 305 A1. The shut-off valves provided in the known toilet are designed as ball valves and, as a result, can be operated in a simple manner only by hand. The object of the invention is to provide a toilet with a simple construction which makes it possible, by simple actuation, to switch over between a flushing and a non-flushing operation. This and other objects are achieved by a toilet having a tank, a water supply arrangement for supplying water via an outlet pipe for a flushing operation, having a flushing line connected to the outlet pipe and having at least one flush valve arranged in the flushing line in a flow-off direction and into which a flushing liquid is introduced via an inlet line, in that the flush valve has a closing element which is urged into a first position when the flush valve is closed

FILEHACK is an award winning data recovery tool for Windows. With many different functions in the recovery process and a modern interface, FILEHACK is among the most used and successful recovery tools.Rasheed Luqmani the 36-year-old CEO and co-founder of MindSketch, a Toronto-based design studio responsible for developing the design of some of the most recognized businesses and institutions in Canada, including the Toronto International Airport, the Royal Ontario Museum, and the Canadian Soccer Association. Luqmani has led some of the industry's most remarkable design-driven companies including the above-mentioned MindSketch, and he was previously the director of design at the world famous IKEA. Rasheed Luqmani the 36-year-old CEO and co-founder of MindSketch, a Toronto-based design studio responsible for developing the design of some of the most recognized businesses and institutions in Canada, including the Toronto International Airport, the Royal Ontario Museum, and the Canadian Soccer Association. Luqmani has led some of the industry's most remarkable design-driven companies including the above-mentioned MindSketch, and he was previously the director of design at the world famous IKEA. Toronto is a great city for design and innovation. With a population of over 1.2 million, Toronto has been ranked as one of the world's most livable cities. Toronto is also the world's most important business hub for fashion, commerce, media, communication, technology, finance, finance, and technology. It is home to some of the world's most influential companies including the headquarters of Rogers, Bell Canada, and Virgin. These large companies sponsor many of Toronto's most popular museums, sports, and entertainment venues. These sponsorships go a long way towards maintaining Toronto's position as one of the most unique cities in the world. But Toronto's designers could stand to branch out a bit more. While the city is home to some of the world's most well-known design companies, including the above mentioned MindSketch, there are still many other places in Toronto that are underutilized and could be transformed into fantastic design and innovation centers. In this week's podcast, Luqmani reflects on the city's current challenges as an innovative city, and discusses a number of exciting initiatives that are currently underway. Welcome to the 39 82138339de
