Problemas De Ing. Quimica I - Ocon y Tojo. Ocon Tojo - Apendice Respuestas. Solucionario Problemas de Ingenieria Quimica Ocon 236. elizabeth. Solucionario Problemas De Ingenieria Quimica Ocon Tojo. This repository doesn't have any tags.Q: Is it possible to make hpricot search for a string and retrieve the result without executing hpricot in the search string? What is the command that will find all the things that contain "OBJECT:" in them? I know that I can search for the string in the doc directly by calling Doc.at_xpath("//text()[contains(., 'OBJECT:')]"). But as there are hundreds of them in the doc I'd prefer to make it a bit more automated - is there a command to make it search for a string and return the result without loading hpricot into memory? A: You can do that with the XPath methods call() and query(): require 'nokogiri'; doc = Nokogiri::HTML(File.open("htmlfile.html")); doc.search("//div[contains(., 'object')]").to_a # => [#]>, #]>, #]>, # 82138339de
