This is one of the coolest tools that the new winpcsignpro 2012 has added to our software, I love it, it's will use .#  
##WINPCSIGN PRO 2012 VERSION HAS A STRATUP PROBLEM IN WINDOWS7 PROFISSONEL 64 BIT. ^ I made my post and in the end I said that I need help. Please help me, because I don't know how to solve this problem, I can't get more information from the Internet. Here is my problem : I have two programs, the first one is a software to open a pdf file and the second one is a software to open an excel file. So I have created two programs in excel with which I am trying to open an excel file and open a pdf file. Here is my code
