Locate the folder with your license key and copy it. Go to the Autodesk Autocad keygen directory. Paste the license key in the license key field in Autocad license key generator. Select the correct file for your license. Click on the Generate button. Done! I have used this keygen with the following license keys: Document Manager - 351415-0 Desktop Architect - 351415-1 Plant Designer - 351415-2 Architecture - 351415-3 CAD Civil - 351415-4 The license key should be active for the same version of Autocad for the duration of the license. You can check your license key on Autocad's license key manager page. Q: Two wordpress installations on same server with different databases I currently have a WordPress install installed on a dev server and I'm trying to create a live copy on the same server, but it seems like there's a problem with the database. When I go to edit the live site's settings, it tells me that the database connection is wrong. Both sites have the same IP, same user, same DB (but different passwords). Am I doing something wrong? A: If you use the same MySQL username/password you're fine as far as the underlying server and OS are concerned (that's why the username/password are listed as "same" on your question). What you need to be aware of is that WordPress often has a bunch of database connections it tries to establish before it gets into its database querying mode. This is where the user/password discrepancy is significant. You can check the first two "available" connections to your database and see if they are what you expect. This can be done with this query: SHOW DATABASES; If the results are what you expect, that means you only have one DB connection "active" in WordPress. You should be able to update the DB connection WordPress is trying to use by simply deleting it: DELETE FROM wp_db; If you're still seeing the wrong DB connection in WordPress, you might try resetting WP by going to /wp-admin/reset-auto-draft.php Good luck! Project Libraries: Work together, share, and work off of your projects in libraries that automatically sync with the cloud. Each library can be customized for project types and be organized to reflect your work flow, allowing you to easily access projects. (video: 1:18 min.) Multivariate Analysis: One-click analysis and assessment of your models, resulting in reports that tell you how your models are performing, using advanced Multivariate analysis. (video: 1:26 min.) Drafting Tools: Bring your sketch to life with the fully featured 3D tools and surfaces. Cut, extrude, and sketch surfaces, then export your 3D model for use in other programs. Also, add 3D primitives or text to your design. (video: 1:46 min.) Cloud Collaboration: Use the new online community space called "GitHub for AutoCAD," an interactive online "wiki" that allows users to share ideas and projects with each other. You can easily download, view, or upload projects, comments, files, and other content. (video: 1:51 min.) Manage Multi-Device Designs: Have a mobile device as a second screen, independent of your computer. Keep your design where it belongs – on your computer and not on your phone. Manage your design in real time as you work on your phone, tablet, or even a Surface Pro. (video: 2:12 min.) View Your Designs Online: No more emailing yourself models for others to view. Your 3D models are automatically published on the cloud for viewing anywhere at any time. (video: 2:19 min.) Sketch outside the box: Draw and edit 2D sketch layers using vector line types. Draw with straight lines, curve segments, and splines – instantly, accurately, and easily. Lay out 2D sketch layers over 2D or 3D objects for a better overall sketch. (video: 2:37 min.) Save Time in your Office: Do more in less time. Switch seamlessly between the most popular CAD applications such as AutoCAD, SketchUp, and Fusion 360 – all without switching computers. (video: 2:54 min.) Document your designs for future use: Drafting & editing capabilities are the key to your success – and easy to see
