AutoCAD Full Product Key Free For Windows [Latest 2022]

History AutoCAD was first released in December 1982 as a desktop application running on microcomputers with internal graphics controllers. It was the first CAD program to be released for personal computers. AutoCAD ran on the IBM PC/XT, and the first commercially available home version was bundled with that computer in December 1983. The program was developed by a small team of Autodesk engineers under the leadership of David Reed, a mechanical engineer at Texas Instruments. Reed was hired by Autodesk to work on an initial CAD program for the TI 99/4A calculator. He was joined by six more engineers from TI who split their time between design and programming work on CAD. Within a few weeks, the CAD code was sufficiently complete to demonstrate that it could actually be used to create usable drawings. The very first drawings created with the new program were for a water heater. As the CAD code was ready, the engineers left TI to form the company Autodesk, Inc. in Palo Alto, California. They kept the program names to avoid legal issues with TI. The original developer's version of the program was released in December 1982. As a result of rapid adoption of the program by a very large clientele, Autodesk began releasing quarterly upgrades in January 1983. By the end of 1985, Autodesk released six different versions of AutoCAD, both desktop and web-based, and quarterly updates are still released. The earliest web versions of AutoCAD used the L.A.N.Y. (Linked Application Network and YEart) network protocol. As of 2018, Autodesk has been using the HTTP (Hypertext Transfer Protocol) protocol since version 2013. In 2014, Autodesk released the first official history of AutoCAD. This user-written history was produced by a group of AutoCAD employees. The original five-part series can still be found online. In September 2014, Autodesk released the first official history of AutoCAD for Android tablets, Windows 8 and Windows 7. In this user-written history, one of the authors, Tom Pedigo, was a software engineer at Autodesk for more than 20 years, before joining the "History of AutoCAD" group. In 2015, Autodesk released the first official history of AutoCAD for Microsoft Windows and iOS devices. In 2017, Autodesk released the first official history of AutoCAD for Android and
