### **What's new in Frost:**

**The Zaccaria Star God is an excellent pinball machine that really helps define the art of table building. There are many aspects that you need to know about the table in order to build a winning machine. One of the biggest aspects of an effective table is game flow. Some players say you should "think like a pinball machine," well in this case, you actually are the pinball machine. The Zaccaria Star God table is built in a very unique manner. Instead of distributing all the weight over multiple flippers and ramping up across a single flipper only, the Zaccaria Star**

**God has a speed ball and an easy ball separated into different flippers. The speed ball has speed, the easy ball has ramping, and the easy ball automatically goes to the end of the flipper (more on this later). This gives you a lot more control over the game. On the Star God, you can essentially get the same ball count with a high flipper, a speed ball, an easy ball and an end ball, where you can get a really high profit margin. A special part about Star God is that it's acrobatic table. Like many acrobatic tables, it has a "frog" shaped goal that allows for a lot of "air," or flipper spin that doesn't count towards your score. The Star God is much more than just an amazingly designed table, it's a game that carries an interesting concept and moments. You get the feeling of playing a pinball game like you do in an arcade, only this time, you don't have to pay quarters. So, if you are looking for an acrobatic and arcade-like table, this is the one. Many Zaccaria tables are very bright and colorful. The Star God is no different. You will see the same look, colors and effects in many of his other tables. The retro look is a lot of people's favorite. If you enjoy that style, you'll find this to be the table for you. Another aspect of the Star God is the mesmerizing LED lighting effects that snake around the ceiling. They are very unique, and many people enjoy them (I included a video of the lighting effect for a small example). The Star God/Pinball building is one of the greatest pinball building experiences that you can have. The Star God is a very simple table, and he knows that. The real trick is the table building. A close friend of**

experiments, and the scientists manipulated the children's brains in such a way that they had memory loss and couldn't remember anything. "In fear I trust" 2nd Episode is a horror visual novel about the atrocities that were committed in the school, and the strange things that happened there. The children and the adults of the institution carry out strange experiments, and the strange experiments are written on the children's desks. Are you going to be able to find out who was responsible for the experiments in the school and who killed the children for their experiments? Play as Nikolay and discover the mysteries of the last desk with only one thing in mind, the truth. Key Features: An original horror story developed for the horror genre, with short interactive chapters. 8 different endings depending on the choices you make during the game. 4 different endings if you solve the mystery of Nikolay. 4 different endings if you solve the mystery of Aleksandra. Original songs and original sound effects. You're probably thinking that this is not a game for the young ones. They may find it scary. You are only right. Just play the game yourself, make all the decisions, and see what happens to you, to Aleksandra, and to the children who lost their dignity. You'll never forget this story. Oliver Stone stopped by the "Late Show With David Letterman" on Tuesday and spoke about his historical new movie "The Untold History of the United States." Stone, who is releasing the movie to DVD and Blu-ray on Sept. 9, said that he is constantly inundated with people who want to see the movie and hear him talk about it. So Stone had to really think hard about the format of his presentation. "I believe that at its very best a movie, unlike a book, can do several things," Stone explained. "It can take you through time. It's a little easier than a book because it has a beginning, middle and an end
