The following trainsets have been included in the New York - New Haven Scenario Pack 02 Add-On: Train Simulator New York - New Haven Scenario Pack 02 Add-On is available from \$4.49 USD/EUR5.49/£3.49. A steam-powered train loadout also has been included with this add-on, which should help to simulate the real and famous NYC - Boston steam train journey, although it is not required for the scenarios included in this pack to be played. Download this product from the Train Simulator Marketplace using Steam. Includes Steamworks integration! The Story so far: After months of hard work, Train Simulator's New York - New Haven Pack 02 has been released! But we're not done yet! We're really just getting started, and we're bringing you this current expansion, the first in a new series of scenarios for the famed Northeastern Corridor, also known as the "NEC." As you journey north and east from New York City's two great passenger stations - New York's Penn Station and Grand Central Terminal - to New Haven, Connecticut, this famous line represents one of America's busiest and most famous rail routes. But, as the NEC is slowly being privatized and converted to a general-use freight line, the service is now becoming increasingly unreliable for scheduled passenger trains. With this expansion, you'll be the engineer of one of America's fastest and most sleek electric intercity trains, the Amtrak Acela, and you'll take the controls of Amtrak's newest power, the ACS-64 "City Sprinter," as well as the veteran HHP-8 Hippo electric. As a Metro-North engineer, you'll test your skills with the workhorse Kawasaki M8 EMU, the dual-mode GE "Genesis" P32AC-DM, and the iconic New Haven Electro-Motive FL9. But in this pack, you'll be the engineer of Amtrak's fastest and sleekest trains - taking the throttle of the New York - New Haven route's Acela, and you'll be the engineer of the workhorse New Haven HHP-8 electric, as well as the legendary Amtrak New Haven Electro-Motive FL9 electric. Whether it's a shorter ride on the trains included in this

John Rymer, Viscount Clifden John Rymer, Viscount Clifden (1763 – 11 July 1822) was a British politician. He was the fourth son of Thomas Rymer and Jane Rymer. He was elected to the House of Commons as Member of Parliament for Bandon in 1786, a seat he held until 1791, when he succeeded his elder brother William as second Viscount Clifden. He married Christiana Woodhouse, daughter and heiress of Samuel Woodhouse of Woodhouse, Derby, on 8 March 1792. They had five sons and one daughter. She died in 1832 and he died shortly afterwards, aged 55, in a riding accident at Clifden. He was succeeded in the viscountcy by his eldest son. - **How to install game TheLastHope:** Go to Google and search "TheLastHope crack setup" and copy the TheLastHope-Setup Google is showing you. Go to your folder C:\ in Windows Explorer and paste this file and make a shortcut to it for later usage.
- **How to record player TV Sopcast live:**
 - Open Windows C:\Sopcast\MediaPlayer\system_server\SopcastLiveSubs\ - Open adebug.py file and note the 2 lines with "open_http()" and turn off player via remote while recording (press spacebar you will see the popup asking you to press a button).
 - Make a new game config (Typing "Reset Menu" for "Reset Game Defaults")
 - Play the game and start recording at that very moment (change the default settings to your liking), and press start recording. You might need to cancel this game first via escape. This is the whole tv stream. Find the small python file in the other folder with working Sopcast embedded in the game (i.e. GameData\TheLastHope-Massive.Data\TheLastHope-Massive.Data\dummy922\TheLastHopeScreenRecorder.py)
 - Paste the snapshot from the game into a text file. Hit save. Go back to the game, wait for the player to open the save folder and rename the.txt file inside.
 - When you have finished recording, press start again and save the player files (player.cfg /.xml) in the Save folder to your choice.
 - Go to the terminal by pressing F9 or browse to C:\. type: python adebug.py -a player.cfg -e --username admin, --password admin and hit enter to disconnect the player.
 - Put the whole batch file on a CD/USB drive, move TheLastHope-Settings.ini to the root
