AutoCAD is the most widely used CAD software in the world and is used for a wide variety of design projects, including architectural, mechanical, electrical, civil engineering, surveying, piping, geospatial, construction, 3D modeling, and mapping. According to ArcGIS, AutoCAD is the most popular, or best-selling, commercial CAD software application. It is among the most popular software applications in the world. What is AutoCAD? AutoCAD is a desktop AutoCAD, a computerized diagramming and drafting software application. The first version was released in 1982, as the first commercial CAD program. What does AutoCAD mean? AutoCAD means "Automatic Computerized Design". AutoCAD is a computer-aided design (CAD) software program developed and marketed by Autodesk. History AutoCAD was initially developed as the 1982 release of the Autocad Drawing System, a PC-based computer graphics design system for architectural, mechanical, electrical, and civil engineering design. The AutoCAD name was later given to the desktop version of the AutoCAD program. The first AutoCAD release in 1982 was for the DEC PDP 11 minicomputer with a graphics display terminal (graphics console). The first commercial product for general use was AutoCAD for the IBM PC; it was released in 1985. Main Features AutoCAD is an integrated software package that contains a computer-aided drafting (CAD) component that is used for architectural, mechanical, electrical, and civil engineering design. The graphical user interface (GUI) of AutoCAD also contains a 2D and 3D map component that provides geographical information and plotting capabilities. The 2D map component is based on the Esri ArcView software product, and the 3D map component is based on the Esri ArcGIS software product. AutoCAD can be installed on

any platform with at least Windows 95/98. AutoCAD requires the Windows NT 4.0 or Windows 2000 operating system. AutoCAD is also available for Windows XP, Windows Server 2003, Windows Vista, Windows 7, and Windows 8/8.1. AutoCAD can be used on Mac OS X (10.2, 10.3, 10.4, 10.5, 10.6, 10.7, 10.8, and

Market share Sales of AutoCAD have been driven by its market share. A "Share of Revenues" is the percentage of the total revenues that a company receives in a particular industry. The Share of Revenues in the CAD market is 42.3% for the top vendor Autodesk. The share of all other products is roughly 7.1%, while the share of the total market in the category of CAD software is 55.4%. AutoCAD in popular culture 2008 film Doubt had a scene with the lead character played by Meryl Streep using AutoCAD. Several scenes from the 2007 film The Last Mimzy were shot using AutoCAD. The 2008 film City of Ember had a scene where the main character used AutoCAD. The film's director, Guillermo Del Toro, mentioned in interviews that the reason for this was that in the indie film world, when budgets start getting big, money-saving measures like using AutoCAD are employed. In an interview with POV, Seth Green, the actor who plays Kip, the lead character of Robot Chicken, claimed that his favorite feature of AutoCAD was its ability to create buildings with nuclear explosions. A visual effects artist for the film Gravity created a gravity plate from 2D AutoCAD drawing that was used for the space scenes, which was the subject of a story in New Scientist. A basic CAD program named AutoCAD (with the help of a Microsoft Windows API) was used to create a physical model of the Notre Dame cathedral in Paris in the 2014 film The Box starring Will Smith. The 2012 film The Girl with the Dragon Tattoo had a scene where Lisbeth

Salander uses AutoCAD to draw a diagram of the prison in which she is imprisoned. The New York Times and The Economist have used AutoCAD to create a 3D map of buildings in the city of New York. Several of the "Innovation and Design Contest" competitions created by TV show MythBusters, including explosions, involve a 3D-printed model of a building built with a series of cross-sectional drawings created with AutoCAD. The 2009 film "Fried Green Tomatoes" used Autodesk AutoCAD to create a cartoon of a rural Southern town using a series of cross-sectional drawings that were used to create a 3D model of the buildings in the town.
