Why is my internet bandwidth faster in windows 8? The application is not official as a feed reader, but rather lists sites with RSS feeds that are connected to the application. A: I'd personally say no. You'd get a horrible habit of install any apps, even random ones, not knowing their purpose and/or security implications. I'd uninstall them later to be safe. A: The ease of installation is only part of the total story. If you enjoy using Windows, but don't want to learn a bunch of new applications and definitely don't want to incur the cost of Windows, feel free to use Windows on a VM, or OSX for that matter. Either way, after you've mastered every OS' quirks, and have your favorite custom applications at your fingertips and everything is mostly working the way you want, you can quickly and painlessly convert your environment to something completely different. This, however, is not a method I'd recommend if you want to learn and enjoy Windows as well.
