Choose the level of difficulty of your game and enjoy the gameplay. There are four difficulty levels, normal, easy, medium, and hard. You will have to find items and solve puzzles to get by each level. You will get an award at the end of each level based on the difficulty you choose. You will get 6 free gifts at the end of the game for finishing all four levels. For instance, if you are asked to find a particular image, try to find it on the ground. What makes this game unique is that it is based on the old school style of games. Think of hidden object games or maybe its a puzzle game. The key is to know that there is something you are looking for in this game and that you will need to focus in these images. The hidden object scenes in Mirror Mysteries get harder, as the number of items increases. The object may be a thing or a picture. It may be a puzzle piece or a button in a computer game. The images may be words or letters. Do not worry if you cannot answer an item. All you need to do is find it. If you spend too much time trying to guess what is on the item, you will miss the item and not win the game. I appreciate the graphics and look and feel, and there are no pop ups or ads throughout the game. The sound was not distracting. The various style items had an effect on the music. The music was actually helpful as the game progressed. The story was pretty good. The acting was fairly good. It was something different. It would have been nice to have more characters in the story. The game ends up being rather short so you might be missing something. If you like puzzles this is a fun game. If not, then you probably won't like it. I had a few items I would like to have seen in the game. 5ec8ef588b
